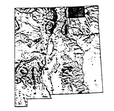
National Wetlands Inventory



- Wetland classifications
- Highways, roads and other manmade structures
- Water features
- Geographic names

DEPARTMENT OF THE INTERIOR
FISH & WILDLIFE SERVICE
1983

Produced by the United States Fish and Wildlife Service

Wetland classifications from 1:80,000 scale black and white aerial photographs taken 1975, 1976 and other source data.

Projection and 10 000-meter grid, zone 13
Universal Transverse Mercator
25 000-foot grid ticks based on New Mexico coordinate system, east zone, 1927 North American datum

To place on the predicted North American Datum 1983 move the projection lines 1 meter north and 47 meters east

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified and delineated on these photographs based on vegetation, visible hydrology, and geography in accordance with **Classification of Wetlands and Deep Water Habitats of the United States** (An Operational Draft) Cowardin, et. al, 1977. The aerial photographs typically reflect conditions during the specific year and season in which they were taken. In addition, there is a margin of error inherent in the use of any map. Therefore, the boundaries of wetlands depicted on the map of a single site may require field revision of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands differently than is presented on this map or this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State, local or regional agencies concerning specific regulatory programs and proprietary jurisdictions that may affect such activities.

Wetland polygons are photographically reduced from large scale overlays and positioned without internal cartographic adjustment to features. Some positional discrepancies may occur.

CONVERSION TABLE

Meters	Feet
1	3.2808
2	6.5617
3	9.8425
4	13.1234
5	16.4042
6	19.6850
7	22.9659
8	26.2467
9	29.5276
10	32.8084

To convert meters to feet multiply by 3.2808.
To convert feet to meters multiply by 0.3048.
