NEW MEXICO

1:100 000 — Scale Map of

National Wetlands Inventory

- Wetland classifications
- Highways, roads and other manmade structures
- Water features
- Geographic names

FISH & WILDLIFE SERVICE

1984

Produced by the United States Fish and Wildlife Service

Wetland classifications from 1:58,000 scale color infrared aerial photographs taken 1980,1981 and other source data.

Projection and 10,000 meter, zone 12 Universal Transverse Mercator
25,000-foot grid ticks based on New Mexico coordinate system, central east zones 1927 North American datum
To place on the predicted North American Datum 1983 move the projection line 0 meters south and 57 meters east

SPECIAL NOTE

This document was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Wetlands were identified on the photographs based on vegetation, visible hydrology and geography in accordance with **Classification of Wetlands and Deep Water Habitats of the United States** (Jin Operational Draft) Cowardin, et al, 1977. The aerial photographs typically reflect conditions during the specific year and season when they were taken. In addition, there is a margin of error inherent in the use of the aerial photographs. The accuracy of any wetland and habitat analysis on a single size may result in a variation of the wetland boundaries established through photographic interpretation. In addition, some small wetlands and those obscured by dense forest cover may not be included on this document.

Federal, State and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, State or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, State or local agencies concerning specific agency regulatory programs and proprietary jurisdictions that may affect such activities.

CONVERSION TABLE

Meters	Feet
1	3.2808
2	6.5617
3	9.8425
4	13.1234
5	16.4042
6	19.6850
7	22.9659
8	26.2467
9	29.5276
10	32.8084

To convert meters to feet multiply by 3.2808
To convert feet to meters multiply by 0.3048

NOTES TO THE USER

- Wetlands which have been field examined are indicated on the map by an asterisk (*).
- Additions or corrections to the wetlands information displayed on this map are solicited. Please forward such information to the address indicated.
- Subsystems, Classes, Subclasses, and Water Regimes in *italics* were developed specifically for NATIONAL WETLANDS INVENTORY mapping.
- Some areas designated as R4SB, R4SBW, OR R4SBJ (INTERMITTENT STREAMS) may not meet the definition of wetland.
- This map uses the class Unconsolidated Shore (US). On earlier NWI maps that class was designated Beach/Bar (BB), or Flat (FL). Subclasses remain the same in both versions.

Other information including a narrative report concerning the wetland resources depicted on this document may be available. For information, contact:

Regional Director (ARDE) Region II U.S. Fish and Wildlife Service

SYSTEM — L — LACUSTRINE

SUBSYSTEM: 1 — LIMNETIC; 2 — LITTORAL

CLASS	Subclass	Code
RB — ROCK BOTTOM	1 Bedrock; 2 Rubble	L1BB; L2BB; L2BC
UB — UNCONSOLIDATED BOTTOM	1 Cobble-Gravel; 2 Sand; 3 Mud; 4 Organic	L1UB; L2UB
AB — AQUATIC BED	1 Algal; 2 Aquatic Moss; 3 Rooted Vascular; 4 Floating Vascular; 5 Unknown Submergent; 6 Unknown Surface	L1AB; L2AB
RS — ROCKY SHORE	1 Bedrock; 2 Rubble	L2RS
US — UNCONSOLIDATED SHORE	1 Cobble-Gravel; 2 Sand; 3 Mud; 4 Organic; 5 Vegetated	L2US
EM — EMERGENT	2 Nonpersistent	L2EM
OW — OPEN WATER/ unknown bottom		L1OW; L2OW

MODIFIERS

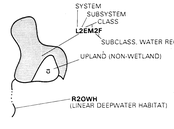
In order to more adequately describe wetland and deepwater habitats one or more of the water regime, water chemistry, soil, or special modifiers may be applied at the class or lower level of the hierarchy. The lower modifier may also be applied to the ecological system.

WATER REGIME			WATER CHEMISTRY		SOIL	SPECIAL MODIFIERS
Non-Tidal		Tidal	Coastal Halinity	Inland Salinity	pH Modifiers for all Fresh Water	
A. Temporarily Flooded	H. Permanently Flooded	K. Artificially Flooded	1 Hypersaline	2 Hypersaline	+ Alkaline	b. Beaver
B. Saturated	J. Intermittently Flooded	L. Intermittently Exposed	2 Eusaline	3 Eusaline	- Acid	f. Farmed (Farmed-Drained)
C. Seasonally Flooded	K. Artificially Flooded	M. Irregularly Exposed	3 Mixosaline	4 Mixosaline	(Blank) Circumneutral	h. Diked/ Impounded
D. Seasonally Flooded/ Well Drained	Tidal	N. Regularly Flooded	4 Polysaline	5 Fresh	- Saline	r. Artificial Substrate
E. Seasonally Flooded/ Saturated	Y. Saturated/ Semipermanent/ Permanent	P. Irregularly Flooded	5 Hyperhaline			s. Spoil
F. Semipermanently Flooded	Z. Intermittently Exposed/ Permanent		6 Euhaline			x. Excavated
G. Intermittently Exposed	U. Unknown		7 Fresh			

Other Modifiers: g. Organic; s. Mineral

**Water regimes are only used in Class Palustrine and Lacustrine systems.

SYMBOLOGY EXAMPLE



□ — Primarily represents **upland** areas, but may include unclassified wetlands such as man-modified areas, non photo-identifiable areas and/or unintentional omissions.
